

Sadhik Kanala

DevOps Engineer | AWS | Kubernetes | CI/CD | Terraform | Linux

+91 9182229587 | sadhikkanala@gmail.com | [Linkedin](#) | [Github](#)

PROFESSIONAL SUMMARY

DevOps Engineer with 3.9+ years of hands-on experience building and operating cloud-native infrastructure on AWS. Sole DevOps owner on a FinTech payments platform processing 1M+ transactions/month, delivering a 40% reduction in deployment lead time and 60% fewer production incidents. Deep expertise across the full DevOps stack: Jenkins, GitHub Actions, ArgoCD (GitOps), Terraform, Ansible, Docker, Kubernetes (EKS), Helm, Prometheus, and Grafana. Strong track record of automating everything — infrastructure provisioning, patch management, security hardening, and observability — across FinTech and Telecom enterprise environments.

TECHNICAL SKILLS

DevOps & CI/CD	Jenkins (Pipelines, Groovy Scripting), GitHub Actions, ArgoCD, Trivy, SonarQube, CI/CD Pipeline Automation, Release Management
Cloud – AWS	EC2, VPC, IAM, S3, EKS, RDS, Lambda, ELB, ASG, CloudWatch, Route 53, ECR
IaC & Config Management	Terraform (modules, remote state, workspaces), Ansible (roles, playbooks)
Containers & Orchestration	Docker, Kubernetes (EKS), Helm Charts, RBAC, HPA, Rolling/Blue-Green Deployments, Ingress, ConfigMaps, Secrets
Observability	Prometheus, Grafana, AWS CloudWatch, ELK Stack (exposure)
Security & DevSecOps	Secrets Manager, SonarQube SAST integration, IAM Policies, Security Groups, Least-Privilege Access, Secure CI/CD Pipelines, Vulnerability Remediation, Patch Management,
Linux Administration	RHEL, Ubuntu, LVM Management, Disk Partitioning, Storage Management, User Management, Linux Server Administration, Troubleshooting, Bash Script
Programming, Scripting & Automation	Python, Bash script, Java, Shell Scripting
Tools & ITSM	Git, Github, Maven, Postman, Jira, ServiceNow, HPESM, VsCode

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)

(Aug 2022 – Present | Bangalore)

PROJECTS

DevOps Engineer | PayG Plus · TCS

(Apr 2024 – Present | Bangalore)

Product: Cloud-native payments platform serving 1M+ transactions per month. Responsible for complete DevOps lifecycle management including CI/CD automation, infrastructure provisioning, Kubernetes orchestration, monitoring, and production observability.

- Architected and implemented end-to-end CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment lead time by 40% and eliminating manual release processes.
- Developed reusable Terraform modules for provisioning AWS infrastructure including EC2, VPC, IAM, Security Groups, and EKS clusters across Development, Staging, and Production environments.
- Containerised Java Spring Boot microservices using Docker and deployed applications on Kubernetes (AWS EKS).
- Managed Kubernetes resources including Deployments, Services, ConfigMaps, Secrets, Ingress, and Horizontal Pod Autoscalers (HPA).
- Implemented Helm Charts for standardised application packaging, version-controlled releases, and rollback support.

- Configured Rolling Deployments and Blue-Green Deployment strategies to achieve zero-downtime releases and reduce deployment-related production incidents by 60%.
- Integrated SonarQube with Jenkins pipelines for static code analysis, quality gates, and secure CI practices.
- Implemented GitOps Continuous Delivery using ArgoCD for declarative and automated Kubernetes deployments.
- Built monitoring and observability solutions using Prometheus, Grafana, and AWS CloudWatch to proactively identify infrastructure bottlenecks.
- Automated operational and deployment tasks using Bash, and Shell Scripting. Worked extensively with AWS services including EC2, S3, IAM, CloudWatch, EKS, Lambda, ELB ASG and RDS.
- Collaborated with Development, QA, and Product teams in Agile environments to improve automation, deployment reliability, and infrastructure scalability..

DevOps & Infrastructure Engineer | TDCNet (Telecom) · TCS (Aug 2022 – Mar 2024 | Bangalore)

Product: Telecom network management platform managing 2000+ Linux servers. Responsible for Linux server administration, CI/CD support, infrastructure automation, monitoring, security compliance, and production support across enterprise telecom environments.

- Administered and maintained RHEL and Ubuntu Linux production servers with 99.8% uptime SLA.
- Managed Linux administration activities including user management, LVM, storage management, and network configuration.
- Developed automation scripts using Bash, Shell Scripting, and Python for monitoring and operational tasks.
- Automated patch management and OS hardening using Ansible Playbooks, reducing manual effort by 70%.
- Supported CI/CD pipelines using Jenkins, GitHub, Docker, and Maven for multiple application teams.
- Reduced application downtime by 15% using proactive monitoring and automated alerting frameworks.
- Implemented security hardening and vulnerability remediation aligned with CIS Benchmarks and ISO 27001 standards.
- Assisted in Docker containerisation and deployment support activities.
- Worked on infrastructure automation, server monitoring, and production support.
- Prepared runbooks, SOPs, and incident response documentation improving MTTR by 25%.
- Collaborated with DevOps and Operations teams to troubleshoot deployment and infrastructure-related issues.

EDUCATION

B.Tech in Electronics and Communications Engineering	July 2022
Presidency University CGPA: 8.07	Bangalore, India

ACHIEVEMENTS

- Awarded twice by **TCS** for Excellence in Learning and Technical Experimentation, recognised for contributions to DevOps research and automation initiatives.
- Elevate Wings Award - Received for clearing Java and Spring Boot JWT internal exams with distinction.
- Received the **Service & Commitment Award** for consistently delivering high-quality support and maintaining SLA compliance across multiple client engagement
- Award for Excellence TCS^AI Igniter, TCS Innovation Award
